Abdul Rahman, the son of Sheikh Anwar Al-Awlaki in the caravan of martyrs American Planes Bomb, and the Yemeni Defense Claims Responsibility!!

Abdul Rahman Anwar al-Awlaki,
May Allah Have Mercy on Him.

American planes launched several strikes against the city of Azzan - Shabwah Province at 9:30 PM on Friday evening on October 14, 2011M, and in one of these strikes Abdul Rahman, the son of the preaching Sheikh Anwar al-Awlaki may Allah have mercy on him, was martyred, and he was 15 years old.

Abdul Rahman was killed by the rockets of the United States of America. The Yemeni Ministry of Defense claimed responsibility for the strikes exactly two weeks after the martyrdom of his father. His death in this criminal way was condemned by Muslims, especially the sons of the Yemeni tribes.

Sheikh Anwar al-Awlaki,
May Allah Have Mercy on Him.

Observers believe that America, which follows democracy and claims that it protects human rights, has broken its own laws and gone against its constitutions by targeting this boy and his father, by killing them without charging them with a single crime. And this is considered to be the first time that American citizens have been killed this way.

Al-Qaeda Denies the News of the Killing of Sheikh Ibrahim Al-Masri

In a copy of a statement obtained by Madad, Al-Qaeda Organization in the Arabian Peninsula denied the news of the killing of Sheikh Ibrahim al-Banna in an American strike on the city of Azzan in Shabwah after the news was announced by the Yemeni Ministry of Defense.

The statement said, "The lies and claims that the agent government in Sana'a announced are not strange for it, as it has announced more than once the killing of some of the Mujahideen. Often, its lies appear, and this time, as is its custom, it has lied twice; once when it spoke as if it were the one executing the strikes; so as to cover up the American massacres against the Muslims in Yemen and announced with this that it was ready to authorize more of these against the sanctity of the country in the name of pleasing the Crusaders, when everyone knows and realizes that America is the one that is executing these ugly crimes with its planes and rockets that are launched from the Gulf of Aden and some of the neighboring countries with the permission and blessing of the governments of the region. The second lie was when it falsely announced the death of Sheikh Ibrahim Al-Banna in order to be proud of a fake victory."

As was reported in the statement, "These blatant American assaults on the Arabian Peninsula require us to remind the Crusaders that war creates war and that the blood of Muslims that they are shedding will not go to waste."

The Mujahideen Stop the Operation of "The West's Plundering of Yemeni Gas" A Large Explosion on the Gas Pipeline Following an American strike in Shabwah

Picture of the Gas Pipeline Explosion

After nearly three hours of American bombings on city of Azzan in Shabwah, the Mujahideen blew up the gas pipeline that stretches from the Safir region in Ma'rib to Balhaf port in Shabwah for "foreign export."

They destroyed 12 meters of the pipeline with timed explosives that led to an explosion that resulted in a large halo that was seen hundreds of kilometers away.

The site of the explosion was carefully chosen to be in a desert area in Shabwah that was free of inhabitants, and the people of the area expressed their strong comfort regarding this operation that would act as a deterrent to the West which will fear for its interests being exposed to danger in the case of other strikes in Yemen.

This gas deal is considered one of the scandals of the Ali Saleh regime, where one million units are sold at 3.20 dollars, when the price of the same amount in other countries reached a price of 11.38 dollars.

This deal leads to a direct loss to the country of over 60 billion dollars over the next 20 years.
